# 3M™ Disc Holder Adapter 9, 5/8-11 External M10-1.25 Internal, 10 per case

3M ID 61500136074   UPC# 00048011229713

Print Share

3M™ Disc Holder Adapter has both an interior threaded shaft and an exterior threaded shaft. The interior threads screw onto the shaft of a sander or other power tool, effectively increasing the size of the tool shaft, in order to accommodate a product with a larger center hole. It may be used with disc holders, discs, and other accessories with 5/8-11 center holes.

- Adapter adds versatility to a power tool by increasing its spindle size to accommodate products with 5/8-11 threads
- Threaded adapter conveniently screws onto a tool to convert a smaller external threaded shaft to a 5/8-11 external threaded shaft
- Compatible with 5/8-11 disc holders or other accessories with 5/8-11 threaded center holes
- Internal thread size of the adapter must match the external thread size of the tool spindle
- Accessory provides versatility and conveniently screws onto the spindle of a power tool
