Specifications

Backing Material	Fleece / polyethylene
Department	OR
Length (Metric)	13.2 cm
Width (Metric)	12 cm

Product Details

Split (dual foil), with cord, 40/case. 15 square inches (96,8 square cm). Compatible with electrosurgical generators capable of monitoring pad-to-patient contact quality.Split (dual foil), with cord, 40/case. 15 square inches (96,8 square cm). Compatible with electrosurgical generators capable of monitoring pad-to-patient contact quality.

Offering effective performance in surgical diathermy, the 3M(TM) 9100 Series Universal Electrosurgical Pad ensures maximum conformability to the application site with its lightweight construction. The unique green safety ring maximises safety for the patient and allows universal orientation. It includes a strong yet gentle adhesive ensuring excellent skin-to-plate contact. 3M patient plates are compatible with most major brands of generator. Cables and adaptors are also available.
