[DESCRIPTION](#)[TECHNICAL DETAILS](#)

## DESCRIPTION

As an addition to our other USB DIY shells, we have a 'micro B female' in a panel-mount-like connector. This isn't true panel mount but you could glue the black plastic shell into your project and then press-fit in the micro B connector. The 5-pins are much easier to solder than a surface mount connector

We have other DIY "USB shells" are available in [USB A plug](#), [micro B](#), [mini B](#) and [USB A socket](#).

Each shell comes with a plastic shell and a proper connector with easy-to-solder tabs.

## TECHNICAL DETAILS

- Assembled Dimensions: 10mm x 9mm x 4.5mm / 0.4" x 0.35" x 0.2"
