DESCRIPTION

What *is* this TRS bit? Turtle Rock Studios? Transmission Raman Spectroscopy? Not quite, more like Tip-Ring-Sleeve.

This nifty, gold-plated connector is known by many names, *phone plug*, *phone jack*, *headphone jack*, *jack plug*, etc. Used to transmit stereo audio signals, these connectors are a mainstay in audio equipment, especially speakers and microphones. For audio, tip is left channel, and ring is right channel, and the sleeve is ground.

Each jack comes with a slim, gold-plated body with three contacts to solder to and a panel mounting hex-nut.

TRS jack connectors don't have to be used only for audio! They make great general-purpose connectors where you need 2 or 3 signals and cheap, common cables. For example, in accessibility tech, these are often used to connect buttons or low voltage actuators.

TECHNICAL DETAILS

- **Approximate dimensions:** 7/8" long x 3/8" diameter
- Gold plated for superior connection
- Ideal for chassis or panel mounting
- Completely sealed jack, non-switching
- Mounts in 1/4" hole in panels up to 0.075" thick, comes with matching hex-nut

Product Weight: 2.0g / 0.1oz
