## DESCRIPTION

After a long day out harvesting in the terminal block fields, we've returned with a veritable bounty of these very nice and compact 2.54mm/0.1" terminal blocks in a variety of sizes.

Our harvest of terminal blocks is great news since nothing makes a project harder to maintain than a lot of loose wiring. That's why we like to use terminal blocks whenever making PCB-to-wire connections. These are 2.54mm spaced blocks so they fit easily into perf or protoboards. They don't fit well into solderless breadboards since the legs are not very long, and **they don't snap together or fit side-by-side on a 0.1" grid** - but that's okay since we've got a bunch of sizes to choose from.

These terminal blocks are also big enough for a range of wire gauges and easy to adjust with a screwdriver. They're not too chunky - so won't take up too much space on your protoboard - and found them pretty ideal for projects where you need a specific number of pins.

This is one single 4-pin terminal block. [Check out our other sizes here!](#)

## TECHNICAL DETAILS

[Datasheet](#)

Dimensions (w/o pins): 11mm x 9mm x 6mm / 0.4" x 0.4" x 0.2"

Pin Length: 3mm / 0.1"

Weight: 1.0g

## MAY WE ALSO SUGGEST...

2.54mm/0.1" Pitch Terminal

Configurable Spring

2.54mm/0.1" Pitch Terminal

2.54mm/0.1" Pitch Terminal

2.54mm/0.1" Pitch Terminal

Terminal Block - 2-pin

2.54mm/0.1" Pitch Terminal

2.54mm/0.1" Pitch Terminal

2.54mm/0.1" Pitch Terminal

Terminal Block - 3-pin

Configurable Spring

2.54mm/0.1" Pitch Terminal
