D-Series 15- and 17-inch All-in-One Desktop Touchcomputers

The new D-Series Rev. C 15" and 17" All-in-One Touchcomputers continue to bring the same style, flexibility and functionality to point-of-sale (POS), retail and hospitality businesses as the previous versions. With a wide array of field-installable peripherals, spill-resistant sealing and a range of input/output port connection options, the D-Series Rev. C models are versatile and powerful. They are designed with the future in mind, allowing easy serviceability of the main components and excellent performance utilizing the Intel Celeron E1500 2.2GHz Dual-Core Processor, just as the previous D-Series models did.

New for the Rev. C models are twice the memory and twice the hard disk drive (HDD) storage capacity - now with 2GB DDR3 RAM and a 320GB advanced format HDD. Also new is a DVI-D video output port which simplifies adding a secondary, customer-facing LCD display when used with the new rear-facing LCD bracket kit.
