**DESCRIPTION**

**TECHNICAL DETAILS**

# DESCRIPTION

Breakaway header is like the duct tape of electronics, and this header is one better with extra long pins on **both** sides. This makes it great for connecting things together that have two sockets - especially solderless breadboards. We also use these with our female-female socket jumpers to create female-male and male-male jumpers!
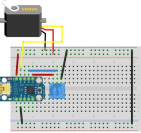

Each pack contains 5 x 16-pin long headers, 0.1" pitch, that can be stacked next to each other on a 0.1" grid and broken apart easily with pliers or diagonal cutters. They're even gold plated so they wont oxidize!
