details

The cream-colored epoxy liquid resin is thixotropic, trowelable, medium-flexible and characterized by excellent moisture resistance. Insulation class: F (155 °C)

- Maximum temperature resistance up to 155 ° C
- Thermosetting resin system
- Thixotropes resin
- Flexible means
- Suitable for filling
- Good impact resistance
- High baking strength
- Solvent-free

Recommended applications

- Embed electronic modules, transformers, etc.
 - Spackling of cavities, eg on winding heads
-

specifications

flame retardant	Yes
hardness	65 Shore D.
Content / volume	5.4 L
material	Thixotropic Epoxy
Maximum operating temperature (Celsius)	155
