## DESCRIPTION

This 2.2"/57mm long antenna has 2dBi of gain and  $50\Omega$  impedance so it will work fantastically with just about any 850/900/1800/1900/2100 wireless receiver/transmitter such as any Cellular or GSM/GPRS device.

Antenna comes with a **Right-angle SMA** connector. [If you need to connect this to an RP-SMA connector for some reason, use this handy adapter](#) and [if you need to connect to a u.FL connector, just pop on this adapter](#).

*"When you make a thing, a thing that is new, it is so complicated making it that it is bound to be ugly. But those that make it after you, they don't have to worry about making it. And they can make it pretty, and so everybody can like it when others make it after you" -*
